@ stefan.hg@outlook.com Ann Arbor, MI

Art can be defined broadly as illusions as the audiences' sensations and meanings arise from the original artistic medium. My high-level goal is to develop computational tools to understand and create artworks that helps fostering accessible art generation. I hope that the general public can produce and interact with pleasant pieces from simple inputs. Toward this end, I'm currently interested in image or sequence generation through Natural Language Processing, Representation Learning and Computer Vision.

EDUCATION

B.S. in Computer Science

University of Michigan

Sep. 2020 - Present Ann Arbor, MI

- GPA: 4.0/4.
- Featured courses: Data Structures & Algorithms; Computer Organization; Foundation of Computer Science; Machine Learning; Artificial Intelligence; Conversational AI; Linear Algebra; Statistics & Data Analysis

B.S. in Computer Science

University of Maryland

Aug. 2018 - May. 2020 College Park, MD

- GPA: 3.97/4.
- Featured Courses: Data Structures & Algorithms; Computer Systems; Discrete Mathematics; Programming Languages; Applied Probability & Statistics; Logic; 2D & 3D Design; Drawing; Digital Art & Design; Rights & Wrongs of Killing People

High School Diploma

High School Affiliated to Renmin University of China

Aug. 2015 - Jul. 2018 Beijing, CN

- GPA: 3.93/4.

HONORS & AWARDS

University Honors & LSA Honors
Honors Program. 2019 - Present

Dean's List & University Honors & James B. Angell Scholar
Academic excellence. 2018 - Present

4th place in eBike Challenge
2018 - 2019

TEACHING

Art Museum Research Peer Mentor

University of Maryland

2020 — 2020 College Park, MD

- Mentored 36 students to complete weekly training on VR, AR, location intelligence and art museum experience
- Introduced to AR development on Android, and tested Google AR tutorial with latest SDK and software
- Reviewed training submissions and research proposals; Led discussions 3 times weekly on proposal feedbacks

SKILLS

Python, C/C++, Java, HTML, LESS, JavaScript, Marko, MATLAB, XML, Android, Ruby, OCaml

NumPy, pandas, Dash, scikit-learn, PyTorch, Node.js, ROS

PyCharm, DataSpell, CLion, VSCode, Linux/Ubuntu

Photoshop, Illustrator, Premiere Pro, Figma

Markdown, LaTeX, Chinese (native), Postman
